Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

This Office Action is in response to the application filed on February 27, 2004, and the election filed on December 7, 2005.

Election/Restrictions

Applicant's election without traverse of claims 1-7 in the reply filed on December 7, 2005 is acknowledged.

Claims 8-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 7, 2005.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP

§ 2172.01. The omitted structural cooperative relationships are: how the cassette comprises a plurality of screws.

Claim 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "the grooves" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Edwards U.S. Pat. No. 4,155,447.

Edwards discloses a cassette for supporting substrates, comprising: a pair of frames (12, 14); a pair of side plates (16, 18) facing each other and interconnecting the frames, the side plates comprising supporting members (23) protruding inwardly; and at least two division plates (20, 22) disposed between the frames, the division plates having supporting members (23) protruding therefrom; wherein the frames (12, 14), the side plates (16, 18) and the division plates (20, 22) defining at least three spaces

Art Unit: 3634

(defined by the spaces between the plurality of supporting members 23, Figure 1) for holding substrates on the supporting members (the device of Edwards is fully capable of performing the function as set forth in claim 1, see Figures 1 and 2). The frames (12, 14) further define mutually corresponding grooves (26, 26', 26'', 26''', Figure 3) and a plurality of screws (46, Figure 6). Additionally, Edwards discloses that the division plates (20, 22) can move freely along the grooves (26, 26', 26'', 26''', Figure 4) and that the division plates (20, 22) are fixed to the frames (12, 14) by tightening the screws (46) disposed in the grooves (26, 26', 26'', 26''') of the frames (column 2, lines 39-43).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards U.S. Pat. No. 4,155,447, alone.

Edwards discloses a cassette for supporting substrates, comprising: a pair of frames (12, 14) opposite each other; a pair of side plates (16, 18) facing each other and interconnecting the frames, two division plates (20, 22) disposed between the frames, wherein the frames (12, 14), the side plates (16, 18) and the division plates (20, 22) defining at least four spaces (defined by the spaces between supporting members 23,

Figure 1) for holding substrates therein. Additionally, the side plates and the division plates comprising supporting members (23) protruding therefrom.

Edwards discloses a cassette for supporting substrates substantially as claimed above with the exception of requiring four division plates between the frames. However, Edwards does disclose that are at least two division plates (column 1, lines 17-18). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include more than two division plates, (i.e. four), for such basic reasons as expanding the storage capacity, effectively holding substrates of a variety of different lengths without the loss of space in shipping, etc.

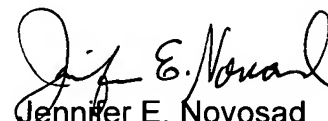

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lindsay M. Maguire whose telephone number is 571-272-6039. The examiner can normally be reached on M-F: 7-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Chilcot can be reached on (571) 272-6777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
